

The connected pool experience

POOL COMMAND

SMART & CONNECTED POOL TIMER

Local control (Bluetooth®)
or
Remote control (with LRMB-POOL)

POOL COMMAND manages the filtration times, controls lightings of the pool, and allows remote programming and control of pool water treatment equipment (heat pump, chlorinator, hydraulic robot, etc.)... so that the swimming pool remains a pleasure!

FEATURES

 Intelligent filtration control
(thermoregulated mode, time programming, boost function)

 Automatic freeze protection

 Control / programming of 2 auxiliaries
(lighting, heat pump, treatment, etc.)

 Water temperature analysis

 Cover position sensor

 Alerts with push & email notifications*

 Treatment & filtration advice*

 Measurement history

Pool Bluetooth® IPX communication
with POOL TECHNOLOGIE water treatment solutions

Also available in variable speed pump version

*requires LRMB-POOL

TECHNICAL SPECIFICATIONS

INSTALLATION

- 230V 50Hz power supply
- Compatible with single and three-phase pumps
- PUMP relay: 250VAC-16A
- Relay AUX1&2: 250VAC-10A
- DIN rail mounting (3 modules)
- WxHxD: 54mm/90mm/63mm
- Temperature: -10°C to 60°C

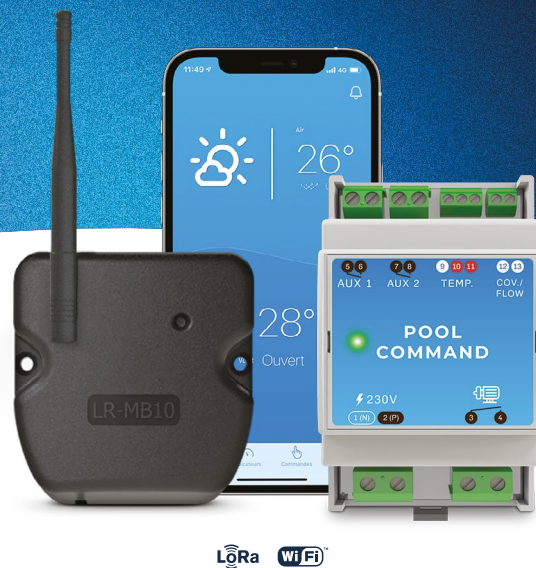

PACKAGING CONTENT

- POOL COMMAND box
- Probe holder ½ + Ø50 paddle clamp
- Temperature probe (PT100)

CONTROL YOUR POOL COMMAND WHEREVER YOU ARE!

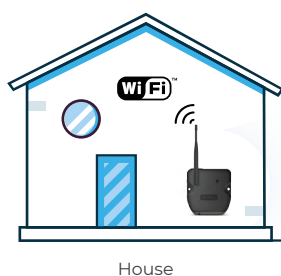

Thanks to **LRMB-POOL**, LoRa™/Wi-Fi™ communication gateway

LRMB-POOL is a radio communication antenna that connects via Wi-Fi to a box and allows up to 10 swimming pool modules to be connected to the Internet. This antenna communicates with the pool modules via a long-range radio link (>250m). It thus makes it possible to remotely control all the modules from the MYINDYGO applications.
