

Professional LED underwater lighting for the residential market

The high quality of EVA LED underwater lighting used in public pools & water parks is now also available to residential pool owners.

We introduce the EVA R(X) LED underwater lighting product range. The R(X) models are based on our critically acclaimed professional A-series and comply with the international IEC EN 60598-2-18 safety standard.

Find out all about our new, qualitative series for the residential market in this info sheet.

The EVA lighting experience at home

RX ECO mono colour

New in our product range is the dimmable EVA RX ECO mono LED underwater lamp. The RX ECO is available in 3 different mono colours; Warm White (3000K), Daylight White (6500K) and Ocean Blue with an astonishing high light intensity, at an energy consumption of just 20W per lamp. This lamp is called "Eco" for good reason.

The RX Eco offers atmospheric underwater lighting in your swimming pool; suitable for every type of pool, easy to install *and* at a budget price. But, you can make your pool experience even more complete with our multicoloured underwater lighting.

EVA RX Smart RGBW

The new RX Smart is a DMX-operated 20W RGBW lamp for residential swimming pools. The RX Smart works via the universal DMX512 protocol. Change the light colour or scene with the standard EC2 touchscreen panel. Or opt for a spectacular show of colours, tailored to your wishes with the advanced EVO controller.

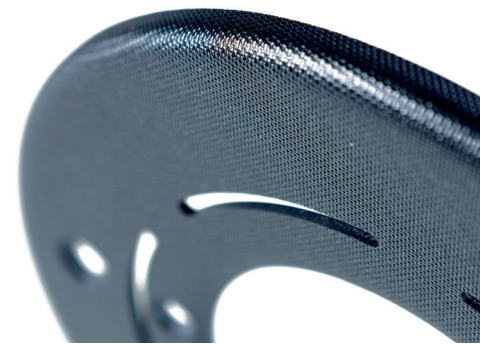

For halogen replacement: EVA R6 RGB

Do you still have halogen underwater lighting? Then your options for an upgrade are limited. Your lighting installation, with a 2-wired powerline, is not compatible with regular multicoloured DMX lights. However, even for such situations there is an EVA multicolour lighting solution available!

The R6 RGB offers multicoloured lighting over a regular 2-wired powerline (no DMX). Basic colour synchronisation for up to 6 lamps. Choose one of the standard preset colours or colour changing scenes and enjoy!

NEW! ABS cover plates

We are proud to introduce our brand new ABS cover plate. This dark grey, luxury design cover was especially created for the R(X)-series. The same quality and durability as our stainless steel cover plates, at a budget price!
